

Connecting LANs with T1? Don't waste your time. And money.

Instead, connect your LANs, miles apart, at the full Ethernet speed of 10Mbps!

Time is money, so why waste yours waiting for T1? Microwave Bypass Systems is the only company that can give you full 10Mbps LAN Extension through our own protocol independent ETHERWAVE and TOKENWAVE Transceivers.

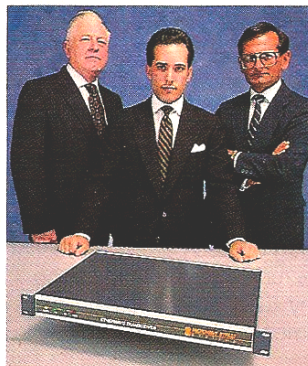

So now you can connect your Ethernet or Token Ring LANs between buildings without unnecessary cost and delay.

AND ALSO INTRODUCING...
Call us about our MAC Level Ethernet Bridge, protocol independent, with addressing and 10Mbps throughput for just \$6200. Demos available in stock.

We can provide a turn-key LAN Extension system in just 60 days—for much less than you'd pay for T1's limited bandwidth, not to mention the high cost of Fiber.

Call us for more information on the most cost effective and efficient LAN Extension systems available.

We won't keep you waiting.
