MICROWAVE BYPASS SYSTEMS  
72 Sharp Street , Building C  
Hingham, Ma 02043

Dear Mike:

I want to let you know how pleased we are at NAVEODTECHDIV with the performance of our MicroWave Bypass system that your company installed back in December. It has exceeded our performance expectations and we have experienced absolutely no problems since it was turned on. We have seen it perform flawlessly in all types of weather ( sleet, snow, fog, ice, rain ) and it has been maintenance free as well. Our user community has commented on numerous occasions about the increased performance and reliability of the system as opposed to our former T1 link. The professionalism and skill of your installation team were evident throughout the installation and testing process, and they took great pains in answering and explaining all our questions. I would highly recommend your system as a cost-effective proven technology for any LAN/WAN requirements and a great alternative to " stringing more cable ".

Sincerely,

*William S. Wood*
