

EXTEND YOUR LOCAL AREA NETWORK

ACROSS TOWN, OR ACROSS THE STATE

MICROWAVE BYPASS SYSTEMS is the first company in the nation to successfully integrate LOCAL AREA NETWORKS of various typologies/architectures over microwave. We can design and provide a turn-key microwave network capable of transmitting up to 20Mbps of data between multiple facilities many miles apart.

FOR MORE INFORMATION and on-site analysis of your Local Area Network call Frank Miani, Vice President Systems Engineering at (617) 494-8700 or write to MICROWAVE BYPASS SYSTEMS, INC. One Kendall Square, Suite 333, Cambridge, MA 02139.

- ▶ Full compatibility with all TOKEN RING networks
IEEE 802.5
Networks employing TCP/IP, XNS or DECNET.
- ▶ Full compatibility with 802.3 and 802.4 ETHERNET.
- ▶ Gateways translate CSMA/CD BUS protocols to TOKEN RING for transmission over microwave.
