Mr. David S. Theodore, President
Microwave Bypass Systems
One Kendall Square, Suite 333
Cambridge MA 02139

Dear David:

Thank you for the opportunity Microwave Bypass has given to me by inviting to see the microwave demo link at Mass General Hospital.

It was a case when the saying "it is better once to watch than hundred times to read" is correct one. The whole Ethernet bandwidth is able to be carried over microwave link indeed. All equipment in the link (including the Microwave bypass's pieces) has proved a validity of such connection.

I am looking forward to setting up an Ethernet microwave link between the Boston University and Harvard.

Yours truly,

A handwritten signature in cursive script, appearing to read "Mikhail Orlov".

Dr. Mikhail Orlov,
Network Systems Engineer
